In this case, for the decision (A or B) test cases (TF) and (FT) meet the coverage criterion, but do not cause the decision to take on all possible outcomes. As with decision coverage, a minimum of two tests cases is required for each decision. 2. 3. 4 Condition Decision Coverage Condition decision coverage combines the requirements for decision coverage with those for condition coverage. That is, there must be sufficient test cases to toggle the decision outcome between true and false and to toggle each condition value between true and false. Hence, a minimum of two test cases are necessary for each decision. Using the example (A or B), test cases (TT) and (FF) would meet the coverage requirement. However, these two tests do not distinguish the correct expression (A or B) from...
