

## Circular Volume 1-81

Filesize: 4.86 MB

### Reviews

*A fresh eBook with an all new standpoint. It is actually written in simple words and phrases instead of difficult to understand. You won't sense monotony at any moment of your own time (that's what catalogs are for relating to if you question me).*

*(Dr. Marcel Collins)*

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 342 pages. Dimensions: 9.7in. x 7.4in. x 0.7in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 edition. Excerpt: . . . in a room having a temperature of 120 F. and only during the last three days of the week was it stored at the 85 temperature. It was expected that this increased temperature for the first four days would result in a more rapid deterioration than when the corn was stored thruout the entire period at the lower temperature. That this was the result is shown in table VI, from which it will be noted that the corn which received no salt had developed considerably more heat than in the former trial. TABLE VI. SHOWING THE TEMPERATURE AND CONDITION OF SHELLLED CORN AFTER STORAGE FOR 4 DAYS AT 120 F. AND FOR 3 DAYS AT 85 F. : THE VARIOUS LOTS OF CORN HAVING RECEIVED DIFFERENT AMOUNTS OF SALT In this case! 4 percent of salt appeared to be of no benefit in preventing heating, altho there was some difference in the amount of mold which had developed. It is of particular interest, however, to note that even under these more adverse conditions the corn which received 2 of salt had not heated at all, and that practically no molding had developed. TRIAL VII The corn used in trial VII consisted of ears just as they came from the field. A fair idea of the condition of this corn may be had from the statement that a considerable number of bushels was sorted over with the idea of separating out the sound, cribleable ears, when...
